

Build Your Own Space Diorama

Bring a cosmic adventure to your desk or shelf! Download, print, and assemble this stunning space diorama, featuring an otherworldly landscape, a daring astronaut, and a glowing sunset over an alien horizon. Your personal portal to the stars – no spaceship required!

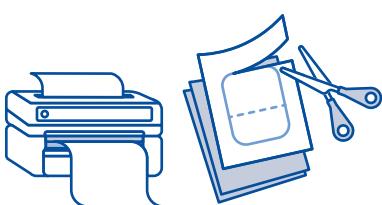

How it works

1.

Print and cut it out.

Print pages 2–4 and carefully cut out all five pieces.

2.

Fold it.

Fold the base inwards to create the foundation of the diorama. All other layers should be folded the opposite way (outwards). Refer to the next pages for folding details.

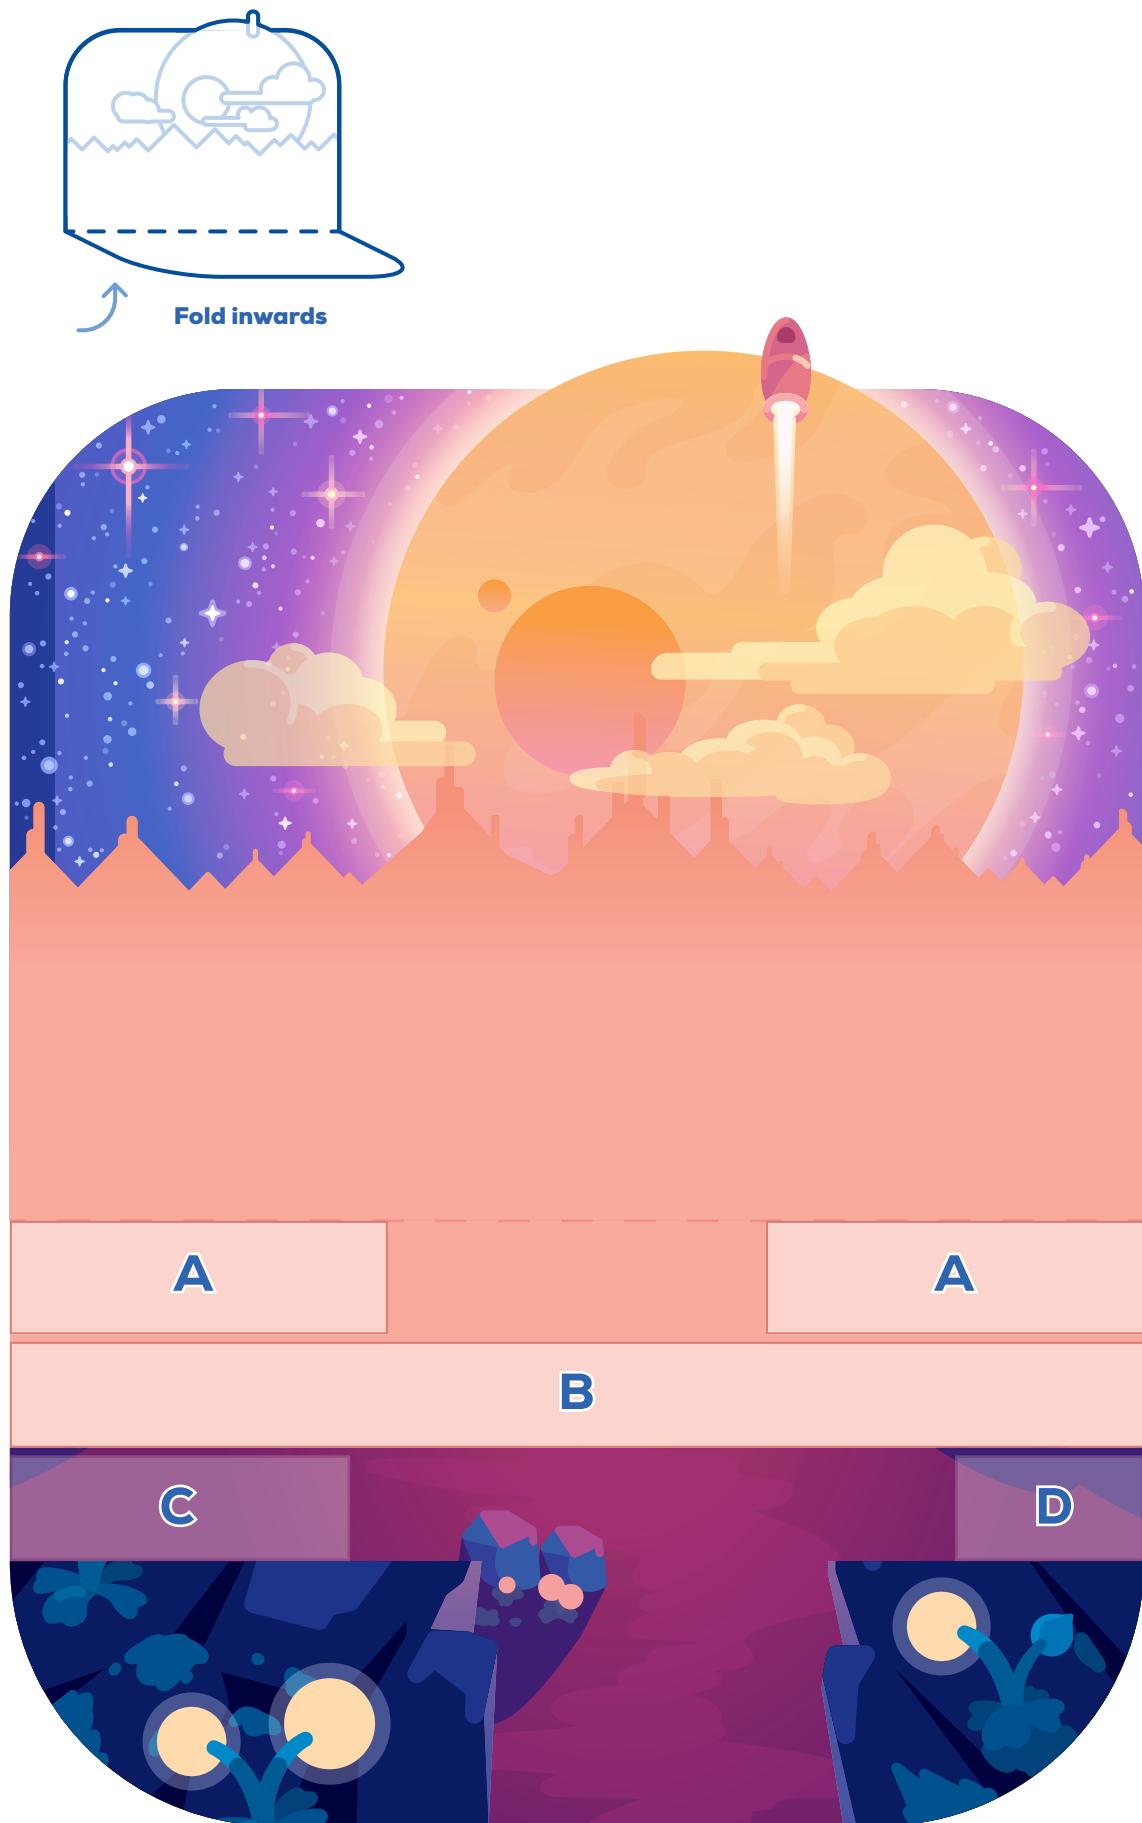

3.

Glue it together.

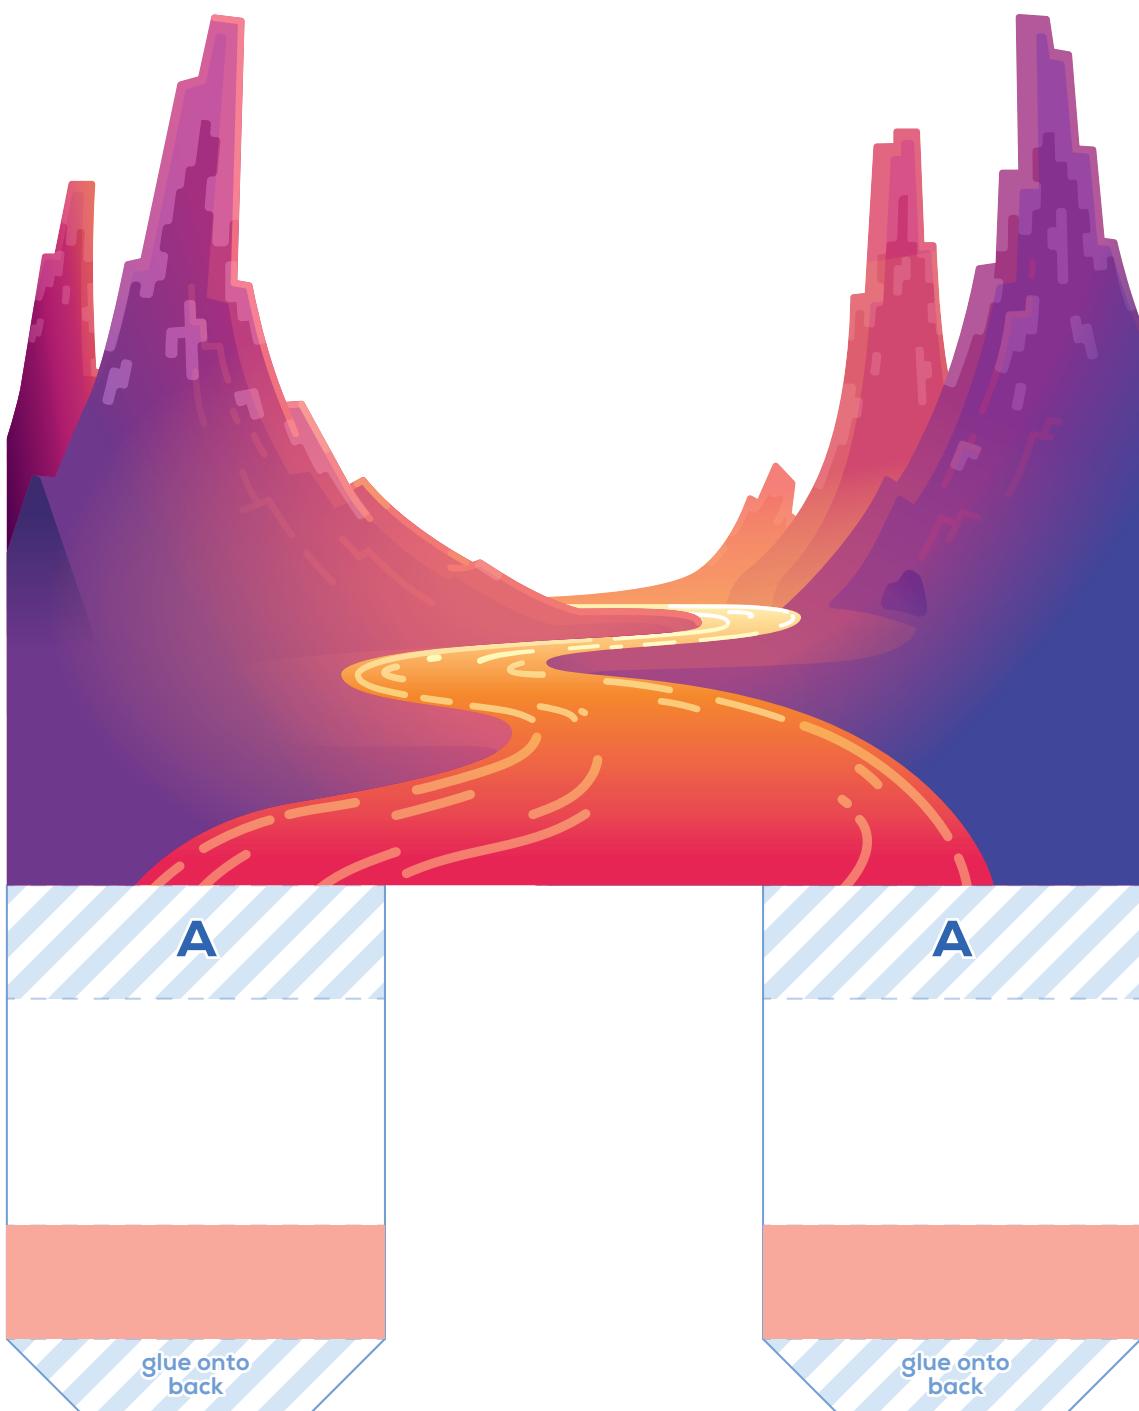

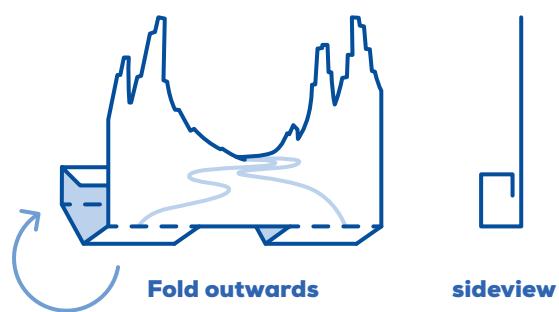

Attach the layers (A, B, C, D) to the base in order. Glue the tabs to the back of each corresponding layer to secure the structure.

Diorama: Base

Diorama: Layer 1

Diorama: Layer 2 and 3
